

# Synchronized Audio Conference Proceedings

CadmiumCD is a multimedia company focused on the technology needs of conference planners. Our products include conference proceedings on CD or online, synchronized audio proceedings, abstract collection systems, online virtual exhibitions and speaker paper management tools.

## SYNCHRONIZED AUDIO PROCEEDINGS

Synchronized audio proceedings allow users to listen to audio from your event while seeing the slides auto-advancing. Every slide has its own audio file, so users can quickly isolate information they want, without having to re-listen to the entire presentation. Users can also quickly search through the slides/audio by using the thumbnail or keyword search sections.

Due to the large amount of data that synchronized audio proceedings requires, we often publish them online at [www.meetingproceedings.com](http://www.meetingproceedings.com). Users typically access the online proceedings with a "Key CD" that provides a secure connection to the online proceedings where users enter unique "Key" code. Audio content is posted to the secure website, so users can begin to access content as soon as its ready, rather than waiting for the completed project to be finalized and mailed to them. A Key CD also cuts down on production costs as it can link to an unlimited amount of content rather than be restricted to the amount of data storage available on a CD or DVD product.

Synchronized conference proceedings can progress either under a contractual arrangement where CadmiumCD is paid a specific amount, or under a revenue share arrangement. With the revenue share arrangement, a minimum number of attendees are needed to attend the conference. CadmiumCD can also record the audio, or we can work with audio captured by other parties.

*Synchronized audio proceedings allow users to listen to audio from your event while seeing the slides auto-advancing.*
