

Conference Proceedings - CD or Online

CadmiumCD is a multimedia company focused on the technology needs of conference planners. Our products include conference proceedings on CD or online, synchronized audio proceedings, abstract collection systems, online virtual exhibitions and speaker paper management tools.

CONFERENCE PROCEEDINGS

Distributed either on CD-ROM or online, our conference proceedings replace the traditional binder that is handed out onsite at a conference. CD or online based proceedings are better than binders for a number of reasons including shorter production time, lower cost, attendee convenience, and reduced environmental impact.

Our Proceedings are suitable for between 20 and 500+ speakers. Regardless of size, the Proceedings come with easily navigated search features, including search by speaker, date, track, session, or keyword. During the production of a Proceedings, the content can be reviewed via a secure website which allows for continuous progress evaluation and reassures you that tight deadlines will be met. Typically, papers can be added up until three days before the Proceedings need to be available for attendees.

Cost of CDs are dependent on several factors including the volume of CDs ordered, the number of speakers, and the type of packaging ordered. CadmiumCD offers a wide range of affordable packaging that is selected to compliment your conference artwork and marketing efforts.

Online proceedings are hosted on www.meetingproceedings.com where you can access proceedings statistics and user details via our "Conference Portal" tool.

CadmiumCD specializes in conference proceedings and conference audio on CD-ROMs and online for organizations and meeting planners.
