

Online Virtual Exhibitions

CadmiumCD is a multimedia company focused on the technology needs of conference planners. Our products include conference proceedings on CD or online, synchronized audio proceedings, abstract collection systems, online virtual exhibitions and speaker paper management tools.

ONLINE VIRTUAL EXHIBITIONS

Virtual exhibitions are designed to mimic the exhibition floor at your event with the capability of moving your cursor around the stands, clicking on "exhibitors" to access their information. Alternatively, use the search button and locate stands based on broad sub-categories that are grouped by the products or services offered.

www.cadmiumcd.com/virtualx.htm

Every exhibitor will have chosen to display either basic contact information or detailed contact information. Exhibitors have links to exhibition-related literature (data sheets, brochures, web links, etc.) which can be viewed directly from the internet or output to a printer if required.

Costs for a virtual exhibition are dependent on the number of exhibitors and the amount of information allowed for each exhibitor.
