

Speaker Data Management

CadmiumCD is a multimedia company focused on the technology needs of conference planners. Our products include conference proceedings on CD or online, synchronized audio proceedings, abstract collection systems, online virtual exhibitions and speaker paper management tools.

SPEAKER DATA MANAGEMENT

CadmiumCD offers meeting planners an online speaker management system that allows speakers to easily submit their papers, presentations, photos, abstracts, or biography online. You can customize the submission form to meet the needs of your event and speakers have the opportunity to add and modify content up until the cut-off date. This is part of a broader system called the Conference Portal that enables meeting planners to manage attendee and speaker data (registrations, papers, proceedings etc).

The screenshot shows a web interface for the AAPM&R 68th Annual Assembly. The main heading is "Data summary for Peter J Wyatt MD" with a "Print Summary" button. A sidebar on the left contains a numbered menu: 1 Start, 2 Profile, 3 Document Upload, 4 Biography, 5 Photo, 6 Abstract, 7 Summary. The main content area displays speaker information: Name: Peter J Wyatt MD, Access Key: POWL4351, Institution: University of Baltimore, Email: pwyatt@uab.edu, City: Newark, State: DE, Country: United States, Permissions Statement: Agree. It also shows "Gait Abnormalities And Spasticity: Diagnosis and Treatment" with a "View" link and a timestamp. Other sections include "Uploads", "Biography", "Schedule" (listing Friday, 9/28/2011, 2:30:00 PM - 4:00:00 PM), "Photo (Not Active)", and "Abstract (Not Active)". A footer note says "If you have problems with these forms, please contact support at support@meetingproceedings.com" and "Harvester Form ID # pd29597001".

This management system provides one central repository that can be accessed by all individuals that need speaker information, from content publishers to educational coordinators. The speaker management system also allows for conference planners to organize the date and time of presentations and can be modified for different speaker names or titles if substitutions are needed.

The speaker management system can be used separately or as part of a conference proceedings package where the conference content is distributed to attendees either on a CD-ROM or online. Pricing is based on how it is used with other services offered by CadmiumCD.

This speaker data tool is part of the Conference Portal – a system that enables meeting planners to manage attendee and speaker data.
